WORKLOG

2003-2010 – after school worked as builder in a small standalone team, love PC, so in free time – freelance (elance, odesk) with c++/delphi7/html, at home worked 2 servers (blackcat, redhat).

2010 – 2014 – university, freelance: elance (now upwork)
c++(Arduino)/delphi7/AndroidStudio/c+builder6/C#/Lazarus/kylix/RAD Studio with firemonkeys (ios. Android, win32).

2014 – 2022 – vint.com.ua(istat) small team - from junior to lead web developer:
istat24.com, istat24.com.ua: perl, rails3-6, postgres, mariadb, redis, sidekiq, aws, hetzner, sentry.
vint.com.ua: perl, crystal-lang, redis, mariadb (with replication), elasticsearch (deleted in 2019).
patisson-toys.com.ua, pacman.com.ua: same as vint, with small front-side changes.
Few other small projects with using php7.2+, Rails5-6, crystal-lang.

2022 – now – testomat.io – middle web developer: Rails6-7, redis, mysql, clickhouse, meilisearch, ember.js, appsignal.

AI – at home ollama+openwebui+searxng, familiar with prompting, api, sometimes use windsurf, cursor.
